Michael L. Parson, Governor Carol S. Comer, Director

RE: Solicitation for Water Quality Data

To Whom It May Concern:

In accordance with the Federal Water Pollution Control Act under Section 303(d), the Missouri Department of Natural Resources biennially prepares an Integrated Water Quality Monitoring and Assessment Report (also known as the 305(b) report). The integrated report is a biennial assessment of Missouri's waters. In preparation of the 2020 report, the Department is soliciting readily available and qualified water quality data for waters of the state of Missouri. The period of record for this solicitation is for data collected between January 1, 2016 and October 31, 2018.

The data must be spatially and temporally representative of the actual annual ambient conditions of the water body. Sample locations should be characteristic and representative of the main water mass or distinct hydrologic areas. With the exception of the data collected for those designated uses that require seasonally based data (e.g., whole body contact recreation, biological community data, and critical season dissolved oxygen), data should be distributed over at least three seasons, over two years, and should not be biased toward specific conditions (such as runoff, season, or hydrologic conditions).

Data meeting the following criteria will be accepted:

- Samples must be collected and analyzed under a Quality Assurance/Quality Control (QA/QC) protocol that follows the U.S. Environmental Protection Agency's (EPA) requirements for quality assurance project plans;
- Samples must be analyzed following protocols that are consistent with the EPA or Standard Method procedures;
- All data submitted must be accompanied by a copy of the organizations QA/QC protocol and standard operating procedures;
- All data must be reported in standard units as recommended in the relevant approved methods;

Solicitation for Water Quality Data
Page 2

- All data must be accompanied by precise sample location(s), preferably in either decimal degrees or Universal Transverse Mercator;
- All data must be received in a Microsoft Excel or compatible format; and
- All data must have been collected within the requested period of record.

The Department appreciates any assistance provided. Please submit all qualified data via email to robert.voss@dnr.mo.gov by December 31, 2018. If you have any questions concerning this matter, please contact Mr. Robert Voss, of my staff, by phone at 573-522-4505, by email at robert.voss@dnr.mo.gov, or by mail at Department of Natural Resources, Water Protection Program, P.O. Box 176, Jefferson City, MO 65102. Thank you.

Sincerely,

WATER PROTECTION PROGRAM

Chris Wieberg
Director
